

Rugged Communication & Network Components

Techaya offer a comprehensive range of solutions that effectively address their customers' wide range of homeland security and military requirements for robustness, security and harsh environment compatibility. Avionics, aerospace, naval and ground mobile systems must ensure secure communications and enforce tactical usage policies.

Similarly, while many units must comply with best practices, regulations and military standards, specific needs differ across sectors. Techaya has created a full range of rugged military communication solutions that are tailored to meet the needs of different forces.

No matter what type of system you need to harden, we have a solution for you.

Rugged Industrial / Homeland Security

- Fast Ethernet Switches
- Gigabit Switches
- Media Converters
- Ethernet Extenders
- Terminal Ser

Military

- 10 Gigabit Switch Routers
- Gigabit Ethernet Switches
- Portable Communication
- Gigabit Media Converters
- Fast Ethernet Switches
- Power Solutions
- Video over Fiber
- Mil Grade Storage Devices

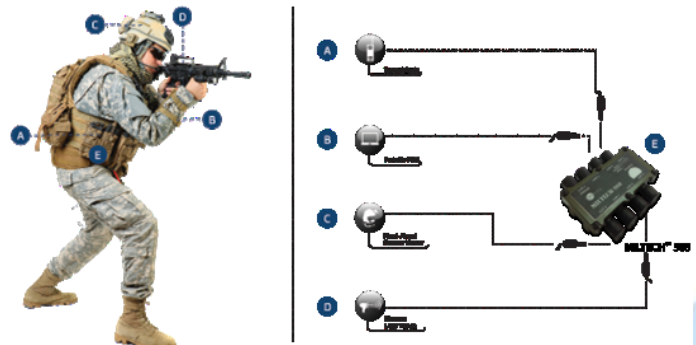

Commercial

- Ethernet Switches
- Media Converters
- Video Solutions
- ET/T1 Solutions
- Protocol Converters

Modern Soldier

- Command Post Application

AVoptics are proud to be working with Techaya and look forward to working with you to help define your solutions. For more information, please use the contact details below or call our office on +44 (0) 1935 471 606.
