FIBRE OPTICS IN HARSH ENVIRONMENTS CONFERENCE

FOHEC'11

Fibre Optics in Harsh Environments Conference

The Fibre Optics in Harsh Environments Conference is an unique European event that ensure industries in this market sector stay up-to-date with current practices and recent developments. Building on previous success this years conference will be held over two days and will cover additional topics. This year FOHEC has teamed up with the daphne research consortium and the second day of the conference will invite industry, suppliers and manufactures to take part in their Dissemination and Advisory Group (DAG).

What topics will be covered?

- Design Tools
- Repair and Maintenance
- Current Applications
- Testing and Validation
- Optical Coatings
- Platform Experiences
- Training
- Future Technologies
- Systems Integration
- Fibre Sensing

Who should attend?

The conference is suitable for all people who have an interest in fibre optics and optical coatings in the harsh environment and presents excellent networking opportunities.

What does it cost?

The conference is **free** to all attendees!

How do I register?

To register and find the latest information please visit the website at WWW.FOHEC.CO.UK

Places are limited so book early to avoid disappointment.

Where is it?

This year FOHEC'11 will be held at the **STEAM** museum in Swindon located along Kemble Drive, Swindon, Wiltshire SN2 2TA +44 (0)1793 466646.
