

## Environmental Policy

AVoptics Ltd personnel are instructed by the Company Directors to ensure that projects for which they are responsible continue to comply with current environmental standards and associated legislation.

AVoptics Ltd undertake to act in accordance with good business and engineering practice and take responsible interest in environmental concerns associated with customer contracts our self-generated projects.

AVoptics Ltd will aim to ensure;

Waste product generated is monitored and will only be disposed of into approved receptacles provided by reputable supplier organizations and removed from site by licensed disposal contractors to controlled units.

- ✓ Compliance against the required environmental directives applicable to our business.
- ✓ The use CFC free products wherever possible.

It is the duty of all employees to maintain the above standard environmental issues that may affect their project and report any areas that can be improved.

The Senior Management Team will closely monitor changes in environmental policy and legislation at regular intervals and accordingly improve AVoptics Ltd commitment to the environment with the objective of reducing pollution levels.
